

Our vision: Thriving Sustainable communities across the Sahelian drylands that have control over the decisions that affect their lives and the resources they need for a secure and fulfilling future

We will support civil society organisations to improve their performance and strengthen their organisations to accelerate impact by...

Mobilising funding and other resources

Supporting the generation of learning and evidence

Providing capacity building support

That will work with poor vulnerable communities in order for them to become strengthened sustainable and resilient communities

They will be strong, effective, sustainable and inclusive organisations

Our SOS Sahel partners will then have stronger foundations to be able to grow
